

# Pom Pom Sheep

## YOU WILL NEED:

**WARNING:** wire rings may have sharp edges

- ✦ Wire ring, black card, wiggly eyes, bell, pipe cleaner & scrap cardboard
- Check out step-by-step photos below.

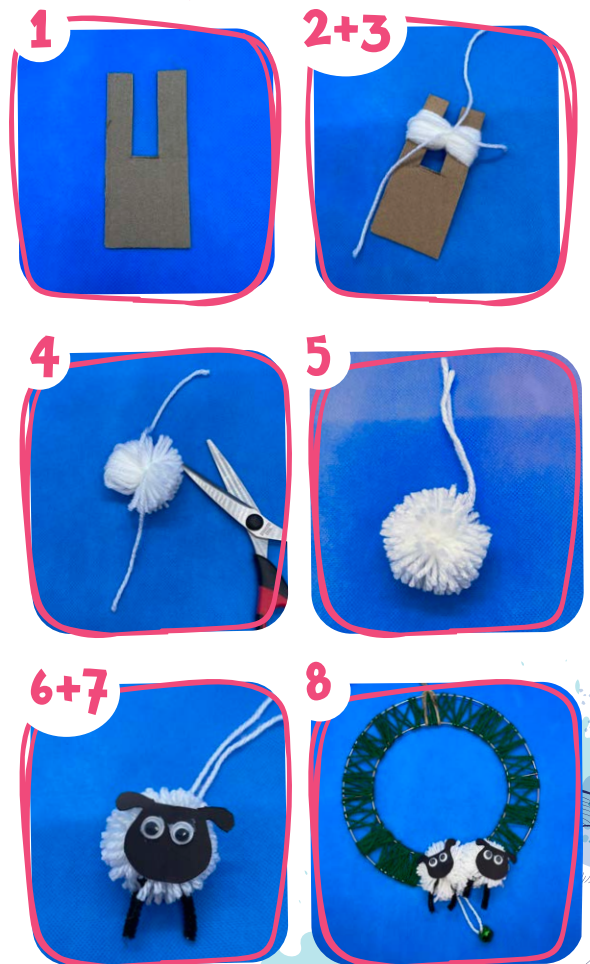

1. **Cut out the U shape from the template sheet.**  
Stick onto scrap cardboard and cut out.
2. **Wrap the wool around the top 2 sections** of your cardboard U **about 50 times.**
3. **Cut a piece of wool about 30cm long.** Slide one end in the middle of the cardboard U prongs at the bottom, and the other at the top. Tie in a double knot, flip and repeat. Leave the ends long so you can tie your sheep onto your wreath.
4. **Gently slide the wool off the card** then carefully cut through the middle of your loops. **BE CAREFUL** not to cut through the knot you tied in step 3.
5. **Fluff your pom pom out** and trim the ends to tidy if needed.
6. **Use the template sheet to cut out your sheep's head from the black card.** Use glue to stick on the wiggly eyes and then use tape to stick the face onto the pom pom.
7. **To make the legs, fold your black pipe cleaner in half and cut.** Poke this through the tied threads in the middle of the pom pom under the face, then bend over.

## WREATH:

8. **Wrap another colour of wool around the wire wreath as a background.** If you've got spare wool or string in other colours at home, add these in too. Use the template sheet and scrap coloured paper to add little flowers or stars.
9. **Use wool to tie the sheep to the bottom of your wreath.**
10. **Thread wool through the back of the bell,** then tie onto the wreath under the sheep so it will jingle in the breeze.
11. **Add a loop of wool or twine to the top** of the wreath and hang it up to display.
